PROFILE

Motivated and detail-oriented B.Tech Computer Science student with a strong interest in Artificial Intelligence, software development, and emerging technologies. Passionate about applying technical knowledge to solve real-world problems through academic projects and collaborative activities. Skilled in programming fundamentals and continuously exploring new tools and technologies to enhance practical understanding. Known for strong teamwork, adaptability, and a quick learning attitude. Seeking opportunities to gain industry exposure, develop technical expertise, and contribute effectively to innovative technology-driven solutions.

EDUCATION

BTech in Computer Science and Engineering

- Babu Banarasi Das Northern India Institute of Technology

2024 - 2028(expected)

- 8.66 CGPA

Intermediate

- Red Rose Senior Secondary School

2022-23

- 85.86%

High School

- Red Rose Senior Secondary School

2020-21

- 96.66%

PROJECTS

• College Event Management System (Technology used :- Streamlit, Python, SQLite)

• Developed a web-based college event management system for event viewing and online registration using Python, Streamlit, and SQLite.

• Mental Health Chatbot (Technology used :- Streamlit, Python, Ollama)

• Developed an AI-powered mental wellness chatbot using Python, Streamlit, and Ollama to provide supportive conversations, affirmations, and guided meditation.

• Sahayak AI (Technology used :- Firebase, JS, HTML,CSS)

Sahayak AI – Developed an AI-powered disaster response platform for smart resource allocation and real-time crisis management. Built features like urgency-based request prioritization, live needs mapping, voice-enabled support, and transparent aid tracking using Firebase, JavaScript, and Google Gemini AI.

SKILLS

- **Programming Languages :-** C, Python (Numpy, Pandas, Matplotlib, Tkinter, Streamlit), Java
- **Database :-** MySQL
- **Web Development :-** HTML, CSS, JS, React.js | GitHub
- **Soft Skills :-** Problem Solving, Adaptability & Continuous Learning, Time Management, Leadership, Collaboration

HACKATHONS

Gen AI Hackathon :-

Participated in a Generative AI hackathon and collaborated in a team to develop a Mental Health Support Chatbot using Python, Streamlit, and Ollama, focusing on empathetic AI conversations and user well-being support.

Green Ideathon (by IIT BHU) :-

Selected for Round 3 after clearing the screening and ideation rounds with Hydro Sync Orchestrator — an AI-based sustainability solution aimed at reducing water usage in data centers.
